Population Characteristics

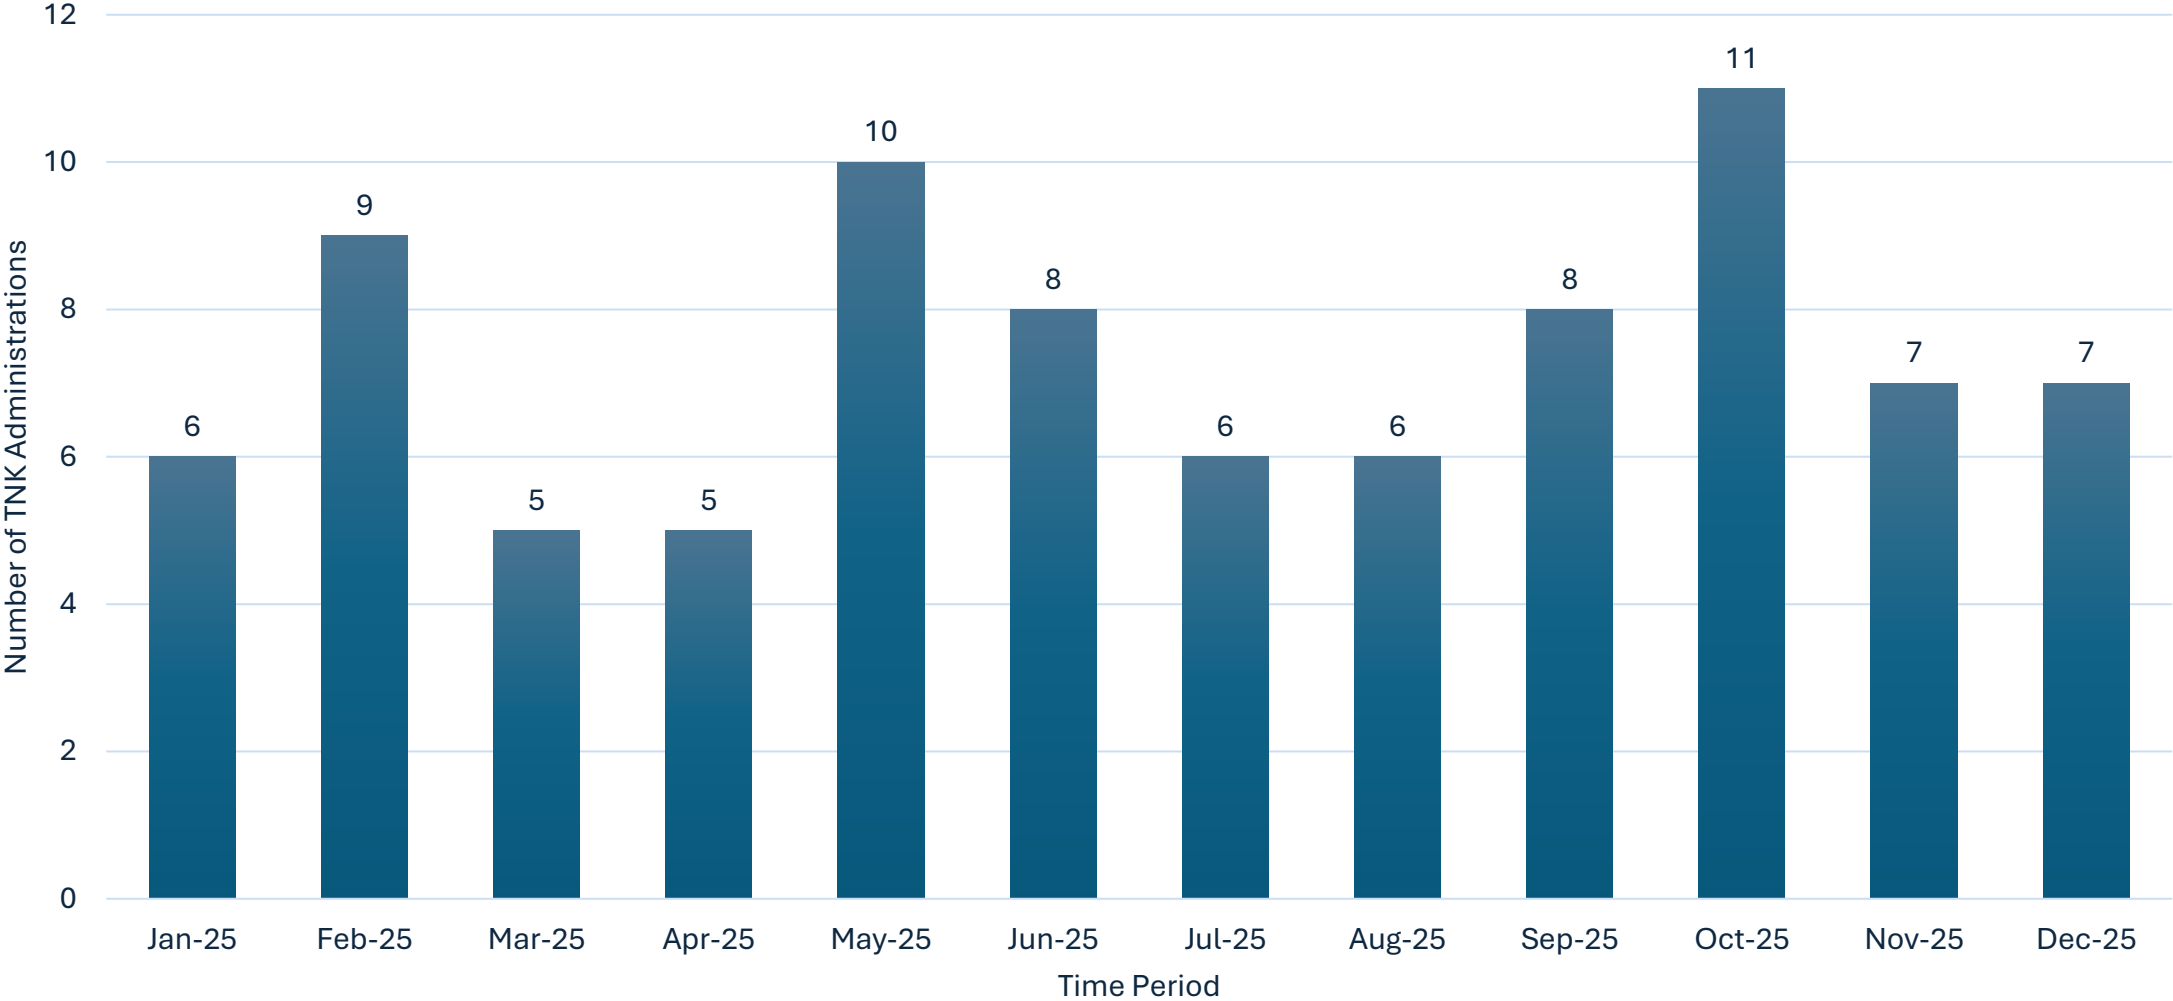

Demographics of Program: DISCHARGE DISPOSITION

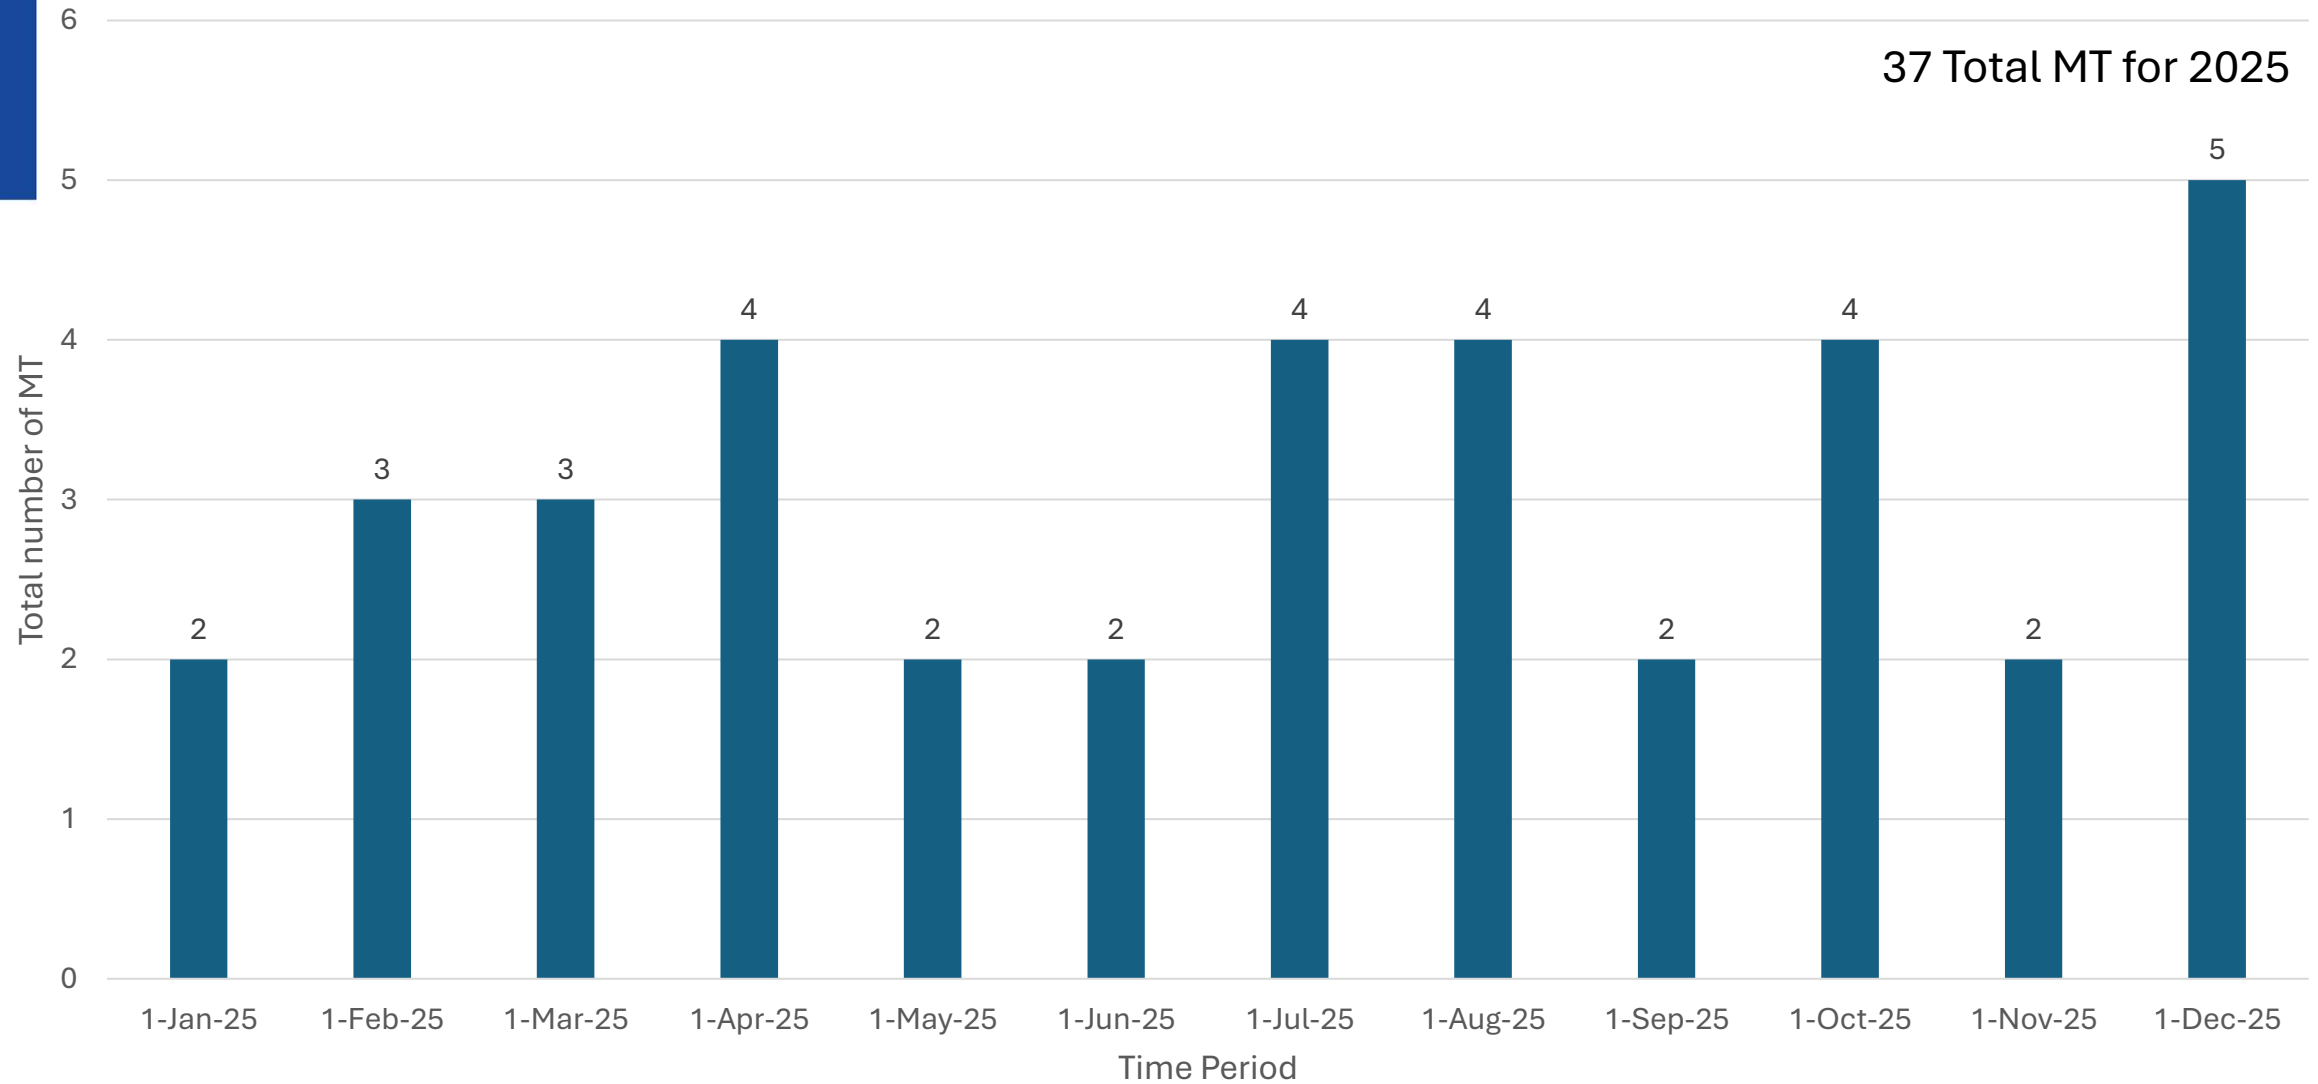

TNK Administration Rates

88 total qualifying Tenecteplase administrations for 2025

Mechanical Thrombectomy (MT) Patients

Door-To-Needle (DTN) Time Median

- Goal: Less than to 45 minutes
- All Stroke Centers follow very strict metrics – these metrics build on each other to ensure that every stroke patient receives the best, evidence-based care. One of the metrics is to provide thrombolytic therapy, clot-busting medicine, to eligible patients within 45 minutes of arrival.
