

## National Bariatric Procedure Outcome Rates (01/01/2025 - 12/31/2025)

| Initial Procedure Case Type                    | Leak % | Bleed % | SSI %  | Related Reoperations % | Related Interventions % | Related Readmissions % |
|------------------------------------------------|--------|---------|--------|------------------------|-------------------------|------------------------|
| Laparoscopic Sleeve Gastrectomy                | 0.13%  | 0.68%   | 0.54%  | 0.40%                  | 0.32%                   | 1.83%                  |
| Laparoscopic Gastric Bypass                    | 0.24%  | 1.38%   | 0.82%  | 1.13%                  | 0.96%                   | 4.30%                  |
| Single Anastomosis Duodeno-Ileal Bypass (SADI) | 0.37%  | 1.33%   | 1.21%  | 0.56%                  | 0.85%                   | 3.56%                  |
| Laparoscopic BPD/BPDDS                         | 0.29%  | 1.19%   | 1.12%  | 1.16%                  | 0.74%                   | 3.98%                  |
| Adjustable Gastric Band                        | 0.00%* | 0.00%*  | 2.47%  | 1.23%                  | 0.82%                   | 2.47%                  |
| One Anastomosis Gastric Bypass (OAGB)          | 0.00%* | 0.97%   | 0.48%  | 1.93%                  | 0.00%*                  | 3.38%                  |
| Other Initial Procedure                        | 0.49%  | 1.23%   | 1.23%  | 1.73%                  | 1.73%                   | 4.44%                  |
| Conversion Case Type                           | Leak % | Bleed % | SSI %  | Related Reoperations % | Related Interventions % | Related Readmissions % |
| Adjustable Gastric Band to Sleeve Gastrectomy  | 0.56%  | 0.88%   | 1.28%  | 1.12%                  | 0.80%                   | 2.23%                  |
| Adjustable Gastric Band to Gastric Bypass      | 0.76%  | 1.60%   | 2.02%  | 2.02%                  | 1.43%                   | 4.21%                  |
| Sleeve Gastrectomy to Gastric Bypass           | 0.45%  | 1.48%   | 1.46%  | 1.84%                  | 1.65%                   | 6.30%                  |
| Sleeve Gastrectomy to BPD/BPDDS                | 0.92%  | 0.92%   | 1.66%  | 2.58%                  | 1.48%                   | 5.17%                  |
| Gastric Bypass to BPD/BPDDS                    | 5.95%  | 3.57%   | 5.95%  | 7.14%                  | 3.57%                   | 7.14%                  |
| Other Conversion                               | 0.81%  | 1.47%   | 2.07%  | 2.11%                  | 2.00%                   | 5.86%                  |
| Revision Case Type                             | Leak % | Bleed % | SSI %  | Related Reoperations % | Related Interventions % | Related Readmissions % |
| Gastric Bypass Revision                        | 0.54%  | 1.39%   | 2.25%  | 2.21%                  | 1.29%                   | 5.40%                  |
| Sleeve Gastrectomy Revision                    | 0.51%  | 0.85%   | 1.20%  | 0.51%                  | 0.85%                   | 3.42%                  |
| Adjustable Gastric Band Revision               | 0.00%* | 0.00%*  | 0.00%* | 0.81%                  | 0.00%*                  | 1.63%                  |
| Gastric Plication                              | 0.00%* | 0.30%   | 0.00%* | 0.00%*                 | 0.30%                   | 2.12%                  |
| Other Revision                                 | 0.81%  | 1.01%   | 1.22%  | 2.64%                  | 1.42%                   | 4.67%                  |

## Bariatric Procedures Performed at TMH (1/1/2025-12/31/2025)

| Initial Procedure Case Type                                                           | All Completed Cases |
|---------------------------------------------------------------------------------------|---------------------|
| Sleeve Gastrectomy, Laparoscopic (Initial)                                            | 132                 |
| Gastric Bypass, Laparoscopic (Initial)                                                | 25                  |
| Gastric Bypass Revision                                                               | 3                   |
| Gastric Bypass Conversion                                                             | 19                  |
| Biliopancreatic Diversion with Duodenal Switch Conversion                             | 1                   |
| Single Anastomosis Duodeno-ileal Bypass / Loop Duodenal Switch Revision or Conversion | 1                   |
